Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

This is the fourth Office Action corresponding to amendment filed Sep 28, 2004. The application contains 14 claims. Claims 2-3, 12 and 13 are cancelled. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. No proper antecedent is found in the claim for "said first surface".

Claim Rejections - 35 USC § 103

Claims 1, 4-9, 11, and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nakayama (Pat No 3,921,620).

The patent to Nakayama shows a band, having fastening means, magnet (6) secured to one side of the band in a crevice and being covered by cloth means (7).

The type of magnet used, dimension and used of indicia are all considered to be obvious matters of engineering choice with no patentable significance. The device shown by Nakayama is fully capable of holding a container by wrapping around the outer surfaces of the container.

Allowable Subject Matter

Claims 10, 14 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive. Applicant argues that Nakamara is not being used to hold a container. The examiner agrees but the container is not being claimed as a positive element of the combination; it is recited in functional language. As mentioned above, Nakamara is fully capable of holding a container. If the container were claimed as a positive element of the combination, said claim would be allowed. Applicant also argues that Nakamara does not teach a magnet having strength of about or greater than 30 kilogauss. The choice of a magnet is considered to be a matter of engineering choice accordingly to the specific magnetic force desired.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3632

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
